Analyzing Your Students' Performance on the Multiple-Choice Section

If you give your students the 2009 exam for practice, you may want to analyze the results to find overall strengths and weaknesses in their understanding of AP European History. The following diagnostic worksheets will help you do this. You are permitted to photocopy them and distribute them to your students for completion.

1. In each section, students should insert a check mark for each correct answer.
2. Add together the total number of correct answers for each section.

3. To compare the student's number of correct answers for each section with the average number correct for that section, copy the number of correct answers to the "Number Correct" table at the end of the Diagnostic Guide.

In addition, under each item, the percent of AP students who answered correctly is shown, so students can analyze their performance on individual questions. This information will be helpful in deciding how students should plan their study time. Please note that one question may appear in several different categories, as questions can cross over different topics.
